

downloadlicense

Downloads a license locally into a <<org>>.lic file so that users can use DBSync without connecting to DBSync license servers at runtime.

Usage

admin (.bat or .sh) downloadlicense orgid=<<your orgid>>

Options:

orgid=<<your orgid>>

While using the command line in windows, parameter with equal (=) operator has to be enclosed in double quote (" ").

Example

Linux

```
./admin.sh downloadlicense orgid=00D12343434534
```

Windows

```
admin.bat downloadlicense "orgid=00D12343434534"
```
