

Release 7.6.3

Bug

[DR-1578](#) File download process fails with INVALID_QUERY_LOCATOR error

[DR-1634](#) Objects tab seems to be corrupted after the upgrade

[DR-1668](#) Query builder on export page transforms data being filtered to uppercase and it won't provide results

New Feature

[DR-1589](#) restore of selected records back instead of everything

checkbox to select only records based on filter/the ones that are deleted/modified to be restored instead of the whole data set.

[DR-1605](#) Include functionality for connecting Salesforce sandbox instances
